

## Technical information

## **Main Dimensions & Performance Data**

| d               | 130 mm      | Bore diameter                     |
|-----------------|-------------|-----------------------------------|
| D               | 200 mm      | Outside diameter                  |
| В               | 45 mm       | Width, inner ring                 |
| С               | 34 mm       | Width, outer ring                 |
| Т               | 45 mm       | Width, total                      |
| C <sub>r</sub>  | 385,000 N   | Basic dynamic load rating, radial |
| C <sub>0r</sub> | 550,000 N   | Basic static load rating, radial  |
| C ur            | 81,000 N    | Fatigue load limit, radial        |
| n <sub>G</sub>  | 3,650 1/min | Limiting speed                    |
| n <sub>ðr</sub> | 2,320 1/min | Thermal speed rating              |
|                 | 5.05 kg     | Weight                            |

## Dimensions

| r <sub>1, 2 min</sub> | 2.5 mm   | Minimum chamfer dimension of inner ring back |
|-----------------------|----------|----------------------------------------------|
|                       |          | face                                         |
| r <sub>3, 4 min</sub> | 2 mm     | Minimum chamfer dimension of outer ring back |
|                       |          | face                                         |
| а                     | 44 mm    | Distance between the apexes of the pressure  |
|                       |          | cones                                        |
| d <sub>1</sub>        | 165.9 mm | Guidance rib diameter of inner ring          |

| Mounting di         | Mounting dimensions |                                                  |  |  |
|---------------------|---------------------|--------------------------------------------------|--|--|
| d <sub>a max</sub>  | 144 mm              | Maximum diameter of shaft shoulder               |  |  |
| d <sub>b min</sub>  | 140 mm              | Minimum diameter of shaft shoulder               |  |  |
| D <sub>a min</sub>  | 178 mm              | Minimum diameter of housing shoulder             |  |  |
| D <sub>a max</sub>  | 190 mm              | Maximum diameter of housing shoulder             |  |  |
| D <sub>b min</sub>  | 192 mm              | Minimum diameter of housing shoulder             |  |  |
| C <sub>a min</sub>  | 8 mm                | Minimum axial space                              |  |  |
| C <sub>b min</sub>  | 11 mm               | Minimum axial space                              |  |  |
| r <sub>a max</sub>  | 2.5 mm              | Maximum fillet radius of shaft                   |  |  |
| r <sub>b max</sub>  | 2 mm                | Maximum fillet radius of housing                 |  |  |
| Calculation factors |                     |                                                  |  |  |
| е                   | 0.43                | Limiting value of Fa/Fr for the applicability of |  |  |
|                     |                     | diff. Values of factors X and Y                  |  |  |
| Υ                   | 1.38                | Dynamic axial load factor                        |  |  |
| Υ 0                 | 0.76                | Static axial load factor                         |  |  |
| Temperature range   |                     |                                                  |  |  |
| T <sub>min</sub>    | -30 °C              | Operating temperature min.                       |  |  |
| T <sub>max</sub>    | 120 °C              | Operating temperature max.                       |  |  |
|                     |                     |                                                  |  |  |

355

Comparative designation to ISO 10317 and ISO
